Office Action Summary

Art Unit: 2856

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17 and 23-25, drawn to sampling apparatus, classified in class 73, subclass 863.85.
 - II. Claims 18-22, drawn to a method of continuous aseptic sampling, classified in class 73, subclass 863.03.

2. The inventions are distinct, each from the other because:

Inventions Group 2 and Group 1 are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as one where the septum or penetrable sealing member is presumed clean by its manufacturing and not to have been contaminated by any prior sampling, etc.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group 1 is not required for Group 2, and vice-versa, restriction for examination purposes as indicated is proper.

Art Unit: 2856

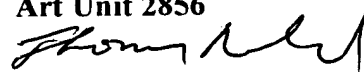

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. A telephone call was made to Mr. Charles E. Golla on April 18, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
7. re IDS filed Dec. 14, 2001: it is believed applicant intended to provide U.S. patent no. 5,199,473 instead of U.S. patent no. 5,119,473. However provision of such is not requested since the disclosure therein is duplicative of already cited and provided documents.
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tom Noland whose telephone number is (703) 305-4765. The examiner can normally be reached on weekdays from 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Hezron E. Williams, can be reached on (703) 305-4705.

The fax phone number for the organization where this application or proceeding is assigned is (703) 308-7722.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
